The tour of the AccessEngineering site will feature:

• Enhanced searching and browsing capability using our site taxonomies
• Browsable course outlines with content linked to 30 common engineering courses
• Filtering options to narrow in on specific content types or even specific equations
• Interactive tools for visualizing material properties and performing calculations
• Additional instructor resources such as case studies, DataVis projects, and solution walkthroughs
• Rich content including over 700 books and 1000 instructional videos
